

Hi, all! :-)

First of all, there is no news on the mobile tripod program at Hughes. The VAR we are working with was hoping to get things finalized at the big satellite show last week, but it didn't happen.

So, the good news is that means you can still get your system at the consumer cost and pay the consumer monthly fees until it is finalized.

Used Auto-acquire System

I have an announcement for everyone looking for an auto-acquire rooftop mount system:

- The following hardware is for sale for \$3200:
 - C-Com iNetVu 980 Drive-Away Antenna
 - 4 watt BUC
 - C-Com iNetVu 7000 Controller
 - Evolution X5 Series Ku-band Satellite Router
 - GPS and all cables to connect the system
- The system was purchased three years ago and used for work. He is now retired.
- The system is in excellent condition and has had minimal use. The seller never had any problems.
- It is a fully functional system with all components and cabling.
- The system is being sold "As Is", no returns.

Obviously, there are a lot of logistical details to be worked out, but if you think you might be interested, just let me know. I will work with you to get all your questions answered and come up with a good plan to make it happen.

Take care,

Barb
