

First of all, I want to wish everyone a very **Happy Thanksgiving!**

And, here is some news about the upcoming Jupiter satellite and the current one. 😊

EchoStar XIX Arrives at Cape Canaveral!

The week before last, our EchoStar XIX satellite arrived at the Cape Canaveral Air Force Station in Florida, where it will be launched aboard a United Launch Alliance Atlas V launch vehicle.

When launched, EchoStar XIX will be the world's highest capacity broadband satellite, dramatically increasing capacity for HughesNet service in North America. The excitement is really building for the December launch!

Review more details about the arrival of EchoStar XIX in Cape Canaveral in this [press release](#). We're in the home stretch!

Campskunk takes his Jupiter System to Shenandoah

Check out the post by Campskunk on the Road Trek web site ... And, make sure you notice the Jupiter system visible in most of the photos!

Updated Forums Coming Soon to MobileInternetSatellite.com!

The MobileInternetSatellite.com forums are being upgraded. Look for another update from me soon, when they are ready.

Take care,
Barb Nolley
